

Low-Emission Flooring

In order to create more sustainable and healthy living and working environments, low-emission flooring is a crucial first step. Low emission flooring contributes to a more sustainable future for everyone by lowering air pollution, promoting the use of sustainable materials, and complying with regulatory requirements.

Low-emission flooring has advantages for both the environment and human health, as well as contributing to regulatory compliance. For instance, there are laws in place in many nations to control the emissions of volatile organic compounds (VOCs) from construction materials, such as flooring. Low emission flooring can assist developers and property owners in adhering to these laws and ensuring that the tenants of their buildings are safe and healthy.

THE LOW-EMISSION FLOORING RANGE

Aware of the impact that buildings have on our comfort, health and wellbeing, Tremco CPG UK is committed to developing solutions that enable the industry to design and construct sustainable buildings that improve user comfort through the eco-design of complete building solutions.

Combining high performance and aesthetics of solvent-free epoxy flooring together with Low VOC Emissions enables us to provide more sustainable and environmental-friendly solutions designed for all types of sectors and needs thanks to their thermal, mechanical, chemical and impact resistance properties, etc.

The Benefits:

Environmentally
Friendly

Health and
Safety

Comfortable

UV Resistant

LOWERING EMISSIONS, MAINTAINING PERFORMANCE

Flowcoat SF41 LE

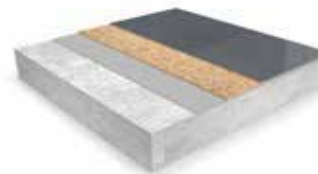

Pigmented, high-performance, solvent-free epoxy coating with enhanced UV resistance and low VOC emissions.

Flowcoat SF41 LE SR

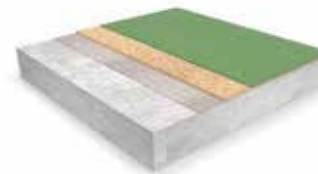

Pigmented, high-performance, solvent-free epoxy anti-slip system with enhanced UV resistance and low VOC emissions.

Flowcoat SF41 LE HD

Pigmented, heavy-duty, solvent free epoxy anti-slip system with enhanced UV resistance and low VOC emissions.

Peran SL LE

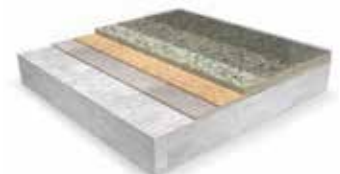

A colourful, self-smoothing, low-VOC resin floor finish with a durable matt sealer.

Peran STB Public

A colourful, self-smoothing, low-VOC resin floor finish with a durable matt sealer.

Peran STB Public SR

A colourful, self-smoothing, low-VOC resin floor finish with a durable matt sealer.
