

BENEFITS FOR EVERYONE

Explore the potential of Solid Insulated Wall Technology (ICF)

Homeowner

- Maximum energy efficiency - **did you know that Nudura can improve the energy efficiency of your home by up to 70%**
- Safety for you and your family - high fire resistance rating of +4 hours (Minimum of 152mm concrete core)
- Long-term value - Nudura offers greater durability and requires less maintenance and repairs over its lifetime compared to traditional builds.
- Eco-friendly - **product contains recycled materials**

Architect / Designer

- **Net-Zero** - achieve net-Zero by using Nudura ICFs as one of your key design elements for a sustainable building envelope.
- **Design tools at your fingertips** - find all of our DWF files in the download centre at **nudura-europe.com**
- **RIBA approved CPDs** - contact a member of our team to enquire about our latest RIBA approved CPD, delivered face to face or online.
- Meet and exceed **UK building regulations** for exterior walls with an effective "continuous insulation" - contact technical for more information.

Builder / Contractor

- **DURAMAX Technology** - Faster installation times, less waste and a reduced amount of seams - the industry's only 2.4m standard block allowing the placement of 1.1m² of a wall area in one building step.
- **DURALOCK Technology** - embedded web fastening strips that run the full 457mm height of each and every form, ensuring the ICFs do not compress during concrete placements.
- **4-Way Reversible System** - patented foam interlock allows the form to be a 4-way reversible system. Eliminates the need for left and right corners which allows for Nudura ICF forms to be used in twice as many scenarios as non-reversible forms.
- **Technical Support & Training** - Nudura aligns itself with the best companies in local geographic areas to provides extensive technical support and **industry leading installation training courses**.

Key Benefits

- **25-50% quicker** construction programme
- **Cost savings of 23%** compared to traditional methods possible
- Construction is **not delayed by weather conditions**
- High modularity, versatility and flexibility in design
- **No special engineering** needed
- Uses less skilled labour force
- Various finished can be installed directly into Nudura - **explore our ICF 500 available from Dryvit**
- Easy to route wire and water pipes through ICF
