

EXTERNAL WALL INSULATION (EWI) SYSTEMS

Standard Colour Chart

Dryvit has been designing and supplying External Wall Insulation (EWI) systems since 1969, focusing on high quality and innovative solutions.

We consistently deliver new products and systems to the market to meet and exceed the energy efficiency and safety requirements of building regulations. In addition to the functional benefits, Dryvit systems provide architects and investors with amazing design possibilities, and creative aesthetic design options.

Dryvit is a brand of Tremco Construction Products Group (CPG) , a European manufacturer and service provider of high-quality building materials. Leaders in the field of EWI our products will help you achieve the results you are looking for.

THE DRYVIT DIFFERENCE

The Trusted, Cost-Effective Choice

The trusted choice for architects, building owners and contractors who want a high performance, insulated cladding solutions. Our systems have been installed in over 500,000 commercial and residential buildings across the world. With the use of efficient modern materials and installation methods, Dryvit systems have continually proven to be a cost-effective build solution. Whether installed in-situ, or prefabricated off-site, our systems can reduce construction time.

Energy Efficiency

Dryvit EWI systems reduce from 30% up to 70% of the energy required (for heating and cooling) to maintain and optimise the temperature inside the building.

Resistance to Weather Conditions

Dryvit systems are extremely durable and maintain their performance under the influence of atmospheric conditions such as; UV radiation, heavy rainfall, high humidity, variable wind loads and fluctuating temperatures.

A Wide Range of Aesthetic Solutions

Our materials allow designers to achieve standard aesthetic effects, e.g. pebble textured or coarse textured finish, as well as many unique decorative effects to stimulate the appearance of stone, granite, wood, brick, concrete, reflective and rusted metal panels - whilst maintaining all thermal advantages of an insulated facade system.

Safe and Durable System

Due to the design of a Dryvit system and the use of high-quality materials, we are able to provide unsurpassed long-term durability meeting design requirements in virtually any location.

Technical Support

Dryvit has built its reputation on the quality of our service as well as our outstanding products. Our team of technical experts fully understand the challenges in today's construction industry and that's why our team

are on hand to support at every stage of your project. From initial product identification through to project inspections, warranties and advice on maintenance schedules, our customers can be assured that help is on hand.

We also offer a range of training options, from on-site practical training to RIBA approved CPD's, here at Dryvit we ensure that our products are applied in the correct way to achieve lasting results.

REDUCE YOUR CARBON FOOTPRINT WITH DRYVIT

It is estimated that around 35% of the overall heat lost from properties in the UK dissipates through un-insulated external walls. This worrying statistic contributes to increased rates of CO₂ emissions and far greater levels of domestic fuel consumption. To enable the Government to meet their commitment of reducing national greenhouse gas emissions by 80% by 2050, this problem has to be addressed.

The UK is committed to reducing its greenhouse gas emissions by at least 34% by 2020 and 80% by 2050, relative to 1990 levels. Due to approximately 14 million homes being inadequately insulated it is estimated that 25% of the UK's total carbon emissions are currently generated from domestic households. Aligned with their commitment to greatly reducing the national level of carbon emission output, the UK Government have introduced a number of key measures to ensure that they are successful in achieving their goals.

There are over 8 million homes in the UK with solid walls, adopting a EWI solution is an extremely effective way to insulate your home or property.

External Wall Insulation (EWI) is an extremely effective method of insulating properties constructed from solid walls, or those with cavities that are categorised as 'hard to treat'. EWI comprises a continuous layer of insulation that is fixed adhesively and/or mechanically to the outside of a building. The insulation is then coated with a decorative weatherproof render which can be finished in a wide array of textures and colours allowing you freedom to improve the appearance of your building to your own taste.

Tremco CPG Europe manufactures high performance building materials in order to solve the complex challenges faced by today's construction industry. With over 1,400 employees across Europe, we are committed to being by your side to shape a world where buildings and structures save energy, last longer and exceed sustainability benchmarks.

From joint sealing, bonding and insulation through to passive fire protection, flooring, waterproofing and roofing solutions- the product brands housed within Tremco CPG Europe cover a wide array of different construction needs. Combined with the wealth of expertise, services and support we provide a truly unique offer - to make our customers more successful time after time.

Tremco CPG Europe is part of RPM International Inc. - one of the world's leading construction products companies for both the industrial and consumer segments.

Europe's leading construction products brands...

Our Values

COLLABORATION

HONESTY & INTEGRITY

RESPECT

ENGAGEMENT

SUSTAINABLE DEVELOPMENT

Delivering World-Class Construction Product Solutions.

The product brands housed within Tremco CPG Europe cover a wide array of different construction needs and provide a wealth of complex services, support and systems that are rarely found together under one roof.

Passive fire protection

Intumescent Coatings,
Fire Stopping

Waterproofing

Potable & Waste Water Industry, Balconies, Terraces,
Basements & Foundations

Sealing, bonding & insulation

Window Insulation, Façade Construction,
Exterior Insulation & EIFS, Structural & Inplant
Glazing, Insulated Concrete Forms (ICFs)

Flooring

Seamless Resin Flooring, Subfloor Preparation,
Car Parking Structures

Roofing

Liquid Applied Systems, Felt Systems,
Vegetated Roofing
