

# LYMESTONE™ & WEATHERLASTIC ADOBE™

Similar to brick, granite and stone, limestone is another heavy material from a bygone era that is energy intensive to harvest, shape, transport and install. Limestone and Weatherlastic Adobe finishes by Dryvit, however, are not. Limestone and Weatherlastic Adobe finishes are comprised of natural minerals, blended with 100% acrylic polymers and long lasting pigments, and our readily available in an infinite colour selection.

On larger wall surfaces, EPS profiles and aesthetic reveals are commonly used to yield realistic limestone effect.

Limestone and Weatherlastic Adobe finishes are often used to compliment other Dryvit finishes such as, TerraNeo, Ameristone, Stone Mist, Custom Brick, Brick Effect and Tuscan Glaze (old world plaster appearance).

**Limestone or Adobe**

On larger wall surfaces, EPS shapes and aesthetic reveals are commonly used to yield a realistic ashlar effect.

**TerraNeo™ & Limestone or Adobe**

The smooth Limestone or Adobe finishes complement Dryvit TerraNeo - The Revolutionary finish that uses minerals and mica to yield a highly realistic granite and smooth stone effect.

**Limestone or Adobe treated with Tuscan Glaze™**

Limestone or Adobe are the perfect finishes on which to apply Dryvit Tuscan Glaze - resulting in an old world plaster appearance.

**Limestone or Adobe & Custom Brick™ or Brick Effect**

The very traditional and popular limestone and brick combination is eminently affordable using Dryvit speciality finishes.
