

# Flowcoat SF41 (0.35-0.43 mm)

A time-proven, cost-effective and high performance, epoxy resin floor coating system with adjustable anti-slip properties

- Prepared Substrate
- 3 Flowcoat SF41 (2 coats)
- Primer (if weak substrate)

### Low Maintenance:

End of life surfaces can be over-coated with minimal surface preparation.

### **Chemical Resistant:**

Protects against a range of acids, alkalis, solvents, alcohol and fuel.

## Slip Resistant:

Slip resistant finish can be tailored to specific client requirements.

## Easy to Clean:

Seamless installation ensures dirt and dust are easily cleaned away.

## Temperature Resistant:

Tolerant of temperaturesup to 70°C.

FIRE RESISTANCE		
EN 13501-1	B <sub>ff</sub> -s1	
WEAR RESISTANCE		
EN 13892-4	ARO.5 (< 50 μm)	
BOND STRENGTH		
EN 13892-8	B2.0 (≥ 2 MPa)	
SURFACE HARDNESS		
EN 13892-6	285 N/mm <sup>2</sup>	
IMPACT RESISTANCE		
EN ISO 6272	IR10 (10 Nm)	
TEMPERATURE RESISTANCE		
Tolerant up to 70°C (intermitte	ent) or 50°C (sustained)	
CAPILLARY ABSORPTION & WATER PERMEABILITY		
EN 1062-3	$0.001 \text{ kg/m}^2 \times \text{h}^{0.5}$	
SLIP RESISTANCE*		
EN 13036-4 (typical values for 4-S rubber slider)	Dry >40 low slip potential	
COMPRESSIVE STRENGTH		
EN 13892-2	>80 N/mm²	
FLEXURAL STRENGTH		
EN 13892-2	>60 N/mm²	
TENSILE STRENGTH		
EN 13892-2	>15 N/mm²	

SPEED OF CURE	10°C	20°C	30°C
Light Traffic	48 hrs	16 hrs	12 hrs
Full Traffic	72 hrs	48 hrs	40 hrs
Full Chemical Cure	12 days	7 days	5 days

The figures above are typical properties achieved in laboratory tests at  $20^\circ\text{C}$  and at 50% Relative Humidity.

Goosewing	Light Grey	Window Grey	Mid Grey
Grey 222	232	2012	280
Sand Beige 326	Pastel Blue 452	Tile Red 637	Pastel Green 740

The applied colours may differ from the examples shown. For a full colour chart and samples, contact your local CPG office.

# **Model Specification**

System	Flowcoat SF41
Finish	Gloss
Thickness	0.35 - 0.43 mm

Preparatory work and application in accordance with manufacturer's instructions.

# **Products Included In This System**

Primer	Flowprime @ 0.25 kg/m² (if weak substrate)
Coating	Flowcoat SF41 (density 1.4 kg/l) 1st Coat @ 0.25–0.3 kg/m² 2nd Coat @ 0.25–0.3 kg/m² Coverage rates will vary with surface profile and temperature.
Non-Slip Finishes	Various grades of quartz, aluminium oxide, glass spheres or silicon carbide can be incorporated to provide a textured surface.

Detailed application instructions are available upon request.

### **Substrate Requirements**

Concrete or screed substrate should be a minimum of 25 N/mm², free from laitance, dust and other contamination. The substrate should be dry to 75% RH as per BS8203 (4.5% on Tramex scale) and free from rising damp and ground water pressure. If no damp proof membrane is present Hydraseal DPM can be incorporated directly beneath the Flowcoat SF41 system.

#### Installation Service

The installation should be carried out by a CPG approved contractor with a documented quality assurance scheme. Obtain details of our approved contractors by contacting our customer service team or enquiring via our website www.flowcrete.eu.

### Aftercare, Cleaning, Maintenance

Clean regularly using a single or double headed rotary scrubber drier in conjunction with a mildly alkaline detergent.

#### Note

No resin system is totally colour fast and may change colour over time (exhibits a yellowing effect). Colour change depends on the UV light and heat levels present and hence the rate of change cannot be predicted. This is more noticeable in very light colours but does not compromise the product's physical or chemical resistance characteristics. We have endeavoured to adopt colours within our standard range which minimise this change.

Intensively coloured products (e.g. hair colourants, medical disinfectants etc.) and plasticizer migration (e.g. from rubber tyres) can lead to irreversible discolouration in the surface. Please contact our Technical Services Department for further advice.

### **Environmental Considerations**

The finished system is assessed as nonhazardous to health and the environment. The long service life and seamless surface reduce the need for repairs, maintenance and cleaning.

Environmental and health considerations are controlled during manufacture and application of the products by Tremco CPG staff and fully trained and experienced contractors.

### **Important Notes**

CPG products are guaranteed against defective materials and manufacture and are sold subject to our standard 'Warranty, Terms and Conditions of Sale', copies of which can be obtained on request. Warranty does not cover suitability, fit for purpose or any consequential or related damages. Please review warranty in detail before installing the products.

System Datasheet written for Tremco CPG. Please consult Technical Team in your own country region for specific details. [02/10/23, 01 UK]

<sup>\*</sup>The slipperiness of flooring materials can change significantly due to the installation process, after short periods of use, due to inappropriate maintenance, longer-term wear and/or surface contaminants (wet or dry). Textured systems are recommended to meet slip resistance value requirements for wet conditions and/or surface contaminants (wet or dry). Please contact our Technical Department for further details and specifications.

Tremco CPG's products are guaranteed against defective materials and manufacture and are sold subject to its standard Terms and Conditions of Sale, copies of which can be obtained on request. Any suggested practices or installation specifications for the composite floor or wall system (as opposed to individual product performance specifications) included in this communication (or any other) from Tremco CPG constitute potential options only and do not constitute nor replace professional advice in such regard. Tremco CPG recommends any customer seek independent advice from a qualified consultant prior to reaching any decision on design, installation or otherwise.
