4. First Aid M	Measures
----------------	----------

#### 4.1 Description of first aid measures

General advice	Move out of dangerous area. Take off all contaminated clothing immediately.		
Inhalation	Move to fresh air. Keep respiratory tract clear. If unconscious place in recovery position and seek medical advice. If not breathing, give artificial respiration. Call a physician if irritation develops or persists.		
Skin contact	Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Call a physician if irritation develops or persists.		
Eye contact	Remove contact lenses. Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Consult a physician.		
Ingestion	Gently wipe or rinse the inside of the mouth with water. Never give anything by mouth to an unconscious person. Do NOT induce vomiting. Get medical attention immediately.		
4.2 Most important symptoms a	4.2 Most important symptoms and effects, both acute and delayed		
Symptoms	No information available.		
4.3 Indication of any immediate medical attention and special treatment needed			
Notes to physician	Treat symptomatically.		
5. Fire-Fighting Measures			

### 5.1 Extinguishing media

#### Suitable extinguishing media

Dry powder, Foam, Carbon dioxide (CO 2), Water mist, Alcohol-resistant foam.

## Extinguishing media which shall not be used for safety reasons

High volume water jet.

#### 5.2 Special hazards arising from the substance or mixture

Explosive reaction may occur on heating or burning. Burning produces irritant fumes. Flash back possible over considerable distance. Hazardous decomposition products formed under fire conditions.

#### 5.3 Advice for firefighters

In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment. Keep containers and surroundings cool with water spray. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

## 6. Accidental Release Measures

#### 6.1 Personal precautions, protective equipment and emergency procedures

#### **Personal precautions**

Use personal protective equipment. Remove all sources of ignition. Ensure adequate ventilation, especially in confined areas. Avoid contact with skin, eyes and clothing.

#### Advice for emergency responders

For personal protection see section 8.

#### 6.2 Environmental precautions

Prevent further leakage or spillage if safe to do so. Prevent product from entering drains. Do not allow material to contaminate ground water system.

#### 6.3 Methods and materials for containment and cleaning up

Methods for Containment	Contain and collect spillage with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see Section 13).
Methods for cleaning up	Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). Use only explosion-proof equipment.

#### 6.4 Reference to other sections

See section 8 for more information.

### 7. Handling and storage

#### 7.1 Precautions for safe handling

Advice on safe handlingWear personal protective equipment. Avoid contact with skin, eyes and clothing. Provide<br/>exhaust ventilation close to floor level. Vapours are heavier than air and can cause<br/>suffocation by reducing oxygen available for breathing. Open drum carefully as content may<br/>be under pressure. Use only in well-ventilated areas. Vapours may form explosive mixtures<br/>with air. Keep product and empty container away from heat and sources of ignition. Take<br/>measures to prevent the build up of electrostatic charge. Do not use sparking tools. Use<br/>only explosion-proof equipment. Have fire extinguishers ready before opening the drum.Hygiene measuresHandle in accordance with good industrial hygiene and safety practice. When using, do not<br/>eat, drink or smoke. Keep away from food, drink and animal feedingstuffs. Keep working<br/>clothes separately.

#### 7.2 Conditions for safe storage, including any incompatibilities

#### **Storage Conditions**

Store in original container. Never fill containers more than 80 % because aerial oxygen is necessary for stabilising. Store between 5 and 25 °C in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Keep in an area equipped with solvent resistant flooring. Do not store together with oxidizing and self-igniting products.
