SECTION 4: First aid measures

4.1 Description of first aid measures

General information:

Move out of dangerous area. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible). Get medical attention if symptoms persist. Remove contaminated clothing and shoes.

Inhalation:

If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, trained personnel should give oxygen. Get medical attention immediately. Place unconscious person on his/her side in the recovery position and ensure breathing can take place.

Skin Contact:

Immediately remove contaminated clothing and shoes and wash skin with soap and plenty of water. If skin irritation or rash occurs: Get medical advice/attention.

Eye contact:

Immediately rinse with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Get medical attention.

Ingestion:

If swallowed, rinse mouth with water (only if the person is conscious). Do not give victim anything to drink if he is unconscious. DO NOT induce vomiting. Get medical attention immediately.

Personal Protection for First-aid Responders:

No data available.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms:

Causes skin irritation. May cause an allergic skin reaction. May cause respiratory irritation.

Hazards:

No data available.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment:

No data available.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media:

Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog.

RW535 AlphaGuard PUMA WP Quick Flash

Unsuitable extinguishing media:

Do not use water jet as an extinguisher, as this will spread the fire.

5.2 Special hazards arising from the substance or mixture:

Highly flammable liquid and vapour. Containers can burst violently when heated, due to excess pressure build-up. Vapours are flammable and heavier than air. Vapours may travel across the ground and reach remote ignition sources, causing a flashback fire danger. Flammable or explosive mixtures with air may be formed. In case of fire, toxic gases may be formed. Carbon monoxide. Carbon dioxide. Organic compounds.

5.3 Advice for firefighters

Special fire-fighting procedures:

Water spray should be used to cool containers. Evacuate area. Dyke and collect extinguishing water. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations.

Special protective equipment for fire-fighters:

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures:

Use personal protective equipment. See Section 8 of the SDS for Personal Protective Equipment.

6.1.1 For non-emergency personnel:

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. Eliminate all sources of ignition. Provide adequate ventilation. Avoid contact with eyes, skin, and clothing. Avoid breathing vapours.

6.1.2 For emergency responders:

See Section 8 of the SDS for Personal Protective Equipment.

6.2 Environmental precautions:

Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water sources or sewer. Environmental manager must be informed of all major spillages.

6.3 Methods and material for containment and cleaning up:

Take precautionary measures against static discharges. Use explosion proof electric equipment. Dam and absorb spillages with sand, earth or other non-combustible material. Transfer to a container for disposal. Dispose of waste at an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.

6.4 Reference to other sections:

For waste disposal, see section 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Technical Measures:	No data available.
Local/Total ventilation:	No data available.
Safe handling advice:	Wear appropriate personal protective equipment. Do not breathe vapour. Avoid contact with eyes, skin, and clothing. Provide adequate ventilation. Use only in well-ventilated areas. Vapours are flammable and heavier than air. Vapours may travel across the ground and reach remote ignition sources, causing a flashback fire danger. Open drum carefully as content may be under pressure. Solvent vapours may form explosive mixtures with air. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Take precautionary measures against static discharges. Ground and bond container and receiving equipment. Do not eat, drink or smoke when using the product. Keep away from food, drink and animal feeding stuffs. Wash hands before breaks and immediately after handling the product. Take off contaminated clothing and wash it before reuse. Private clothes and working clothes should be kept separately.
Contact avoidance measures:	No data available.

7.2 Conditions for safe storage, including any incompatibilities

Safe storage conditions:	Never fill containers more than 80 % because aerial oxygen is necessary for stabilising. Store in closed original container at temperatures between 5°C and 30°C. Store in a cool and well-ventilated place. Store in a dry place. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Protect from sunlight. Store away from: Oxidising agents. Peroxides Polymerisation initiators. Acids. Bases. Rust. Activated carbon.
Safe packaging materials:	No data available.

8.2 Exposure controls

Appropriate Engineering Controls:

Observe good industrial hygiene practices. Observe occupational exposure limits and minimise the risk of inhalation of vapours and mist. Adequate ventilation should be provided so that exposure limits are not exceeded. Mechanical ventilation or local exhaust ventilation may be required. Use explosion-proof ventilation equipment.

Individual protection measures, such as personal protective equipment (PPE)

Eye/face protection:

Wear safety glasses with side shields (or goggles). Provide easy access to water supply and eye wash facilities.

Hand Protection:

Material: Butyl rubber.
Break-through time: > 60 min
Glove thickness: >= 0,7 mm
Additional Information: Chemical resistant gloves The most suitable glove must be chosen in consultation with the gloves supplier, who can inform about the breakthrough time of the glove material. Wear suitable gloves tested to EN374. Gloves should be replaced regularly and if there is any sign of damage to the glove material.
Material: Polyvinyl alcohol (PVA).

Skin and Body Protection:

Wear suitable protective clothing. Chemical resistant clothing Flame retardant antistatic protective clothing.

RW535 AlphaGuard PUMA WP Quick Flash

Respiratory Protection:

In case of insufficient ventilation, wear suitable respiratory equipment. It is recommended to use respiratory equipment with combination filter, type A2/P2. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Self-contained breathing apparatus.

Hygiene measures:

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking and/or smoking. Routinely wash work clothing to remove contaminants. Discard contaminated footwear that cannot be cleaned. Do not eat, drink or smoke when using the product. Take off contaminated clothing and wash it before reuse. Private clothes and working clothes should be kept separately.

Environmental Controls:

Do not release into the environment. Do not discharge into drains, water courses or onto the ground.
