

# TremTrim GRP Design Guide

Product Range Overview

**Our TremTrim range has been carefully designed to complete a watertight finish running upto upstands and brickwork on flat roof system installations.**

**This document is a guide to help understand the quantities required when ordering products for the installation of TremTrim system accessories including edge trims, internal/external corners, termination bars and hard edges.**

TremTrim 150mm LQD Int Corner	RW161511386	N/A	150mm face, 65mm leg, 200mm x 200mm returns	Anthracite

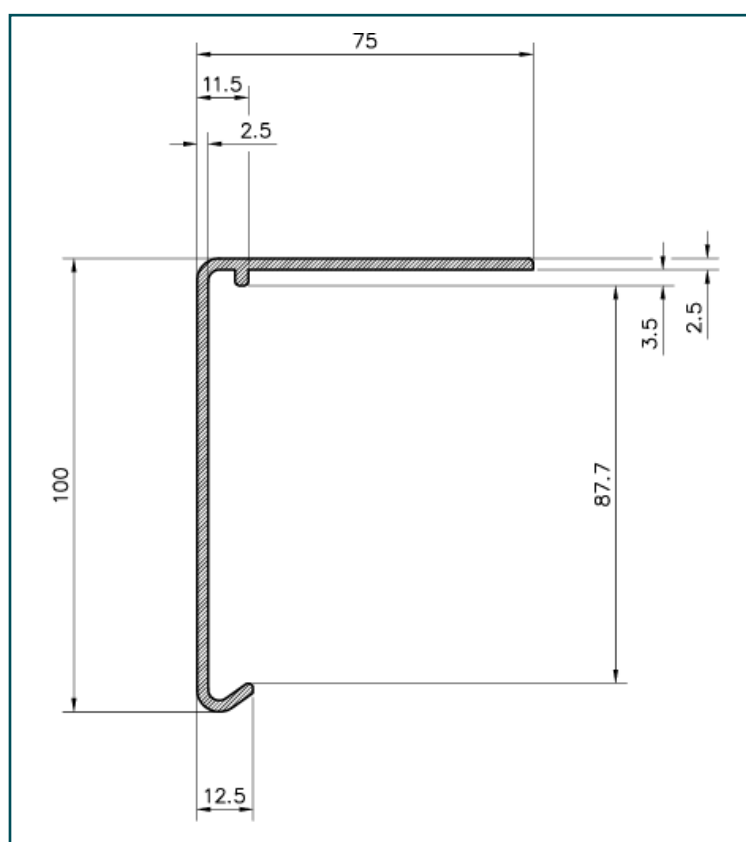

\*Bespoke trim colours are available upon request and subject to a minimum order quantity.

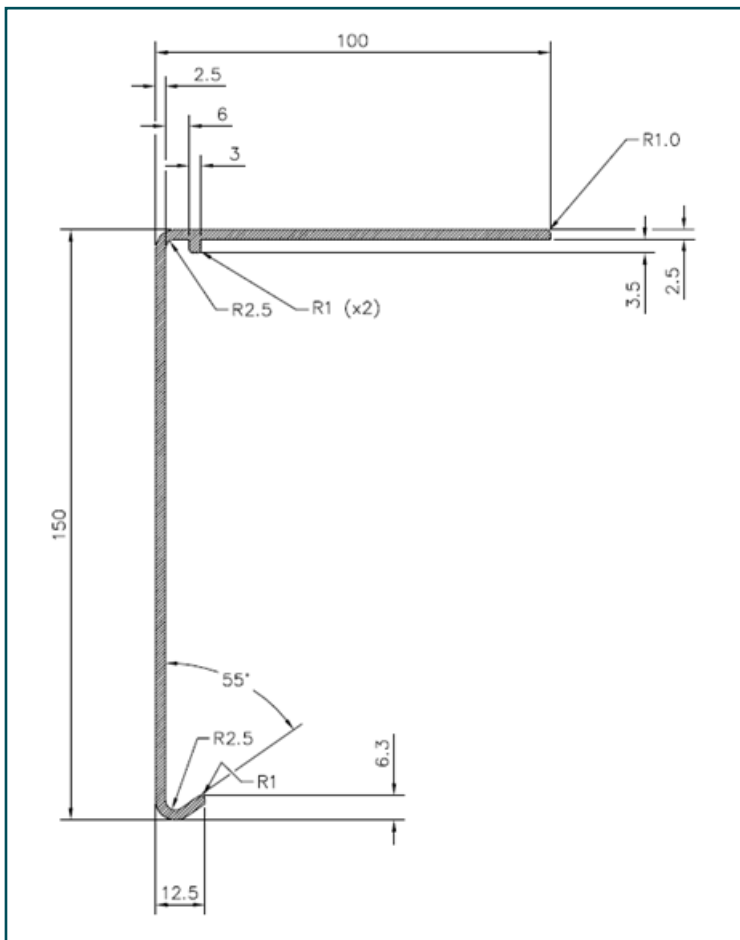

PRODUCT TITLE	PRODUCT NO	COVERAGE M <sup>2</sup>	UNIT SIZE	COLOUR
<b>Liquid Applied Membrane Systems (70mm Watershed Trims)</b>				
TremTrim 70mm LQD Drip Trim 2.5m	RW162511387	2.5m Linear meters	70mm Face, 75mm Leg, 2.5m length	Black
TremTrim 70mm LQD Drip Trim Ext Corner	RW162511388	N/A	70mm face, 75mm leg, 200mm x 200mm returns	Black
TremTrim 70mm LQD Drip Trim Int Corner	RW162511389	N/A	70mm face, 75mm leg, 200mm x 200mm returns	Black

PRODUCT TITLE	PRODUCT NO	COVERAGE M <sup>2</sup>	UNIT SIZE	COLOUR
<b>Liquid Applied Membrane Systems (100mm Watershed Trims)</b>				
TremTrim 100mm LQD Drip Trim 2.5m	RW162511390	2.5m Linear meters	100mm Face, 75mm Leg, 2.5m length	Black
TremTrim 100mm LQD Drip Trim Ext Corner	RW162511391	N/A	100mm face, 75mm leg, 200mm x 200mm returns	Black
TremTrim 100mm LQD Drip Trim Int Corner	RW162511392	N/A	100mm face, 75mm leg, 200mm x 200mm returns	Black

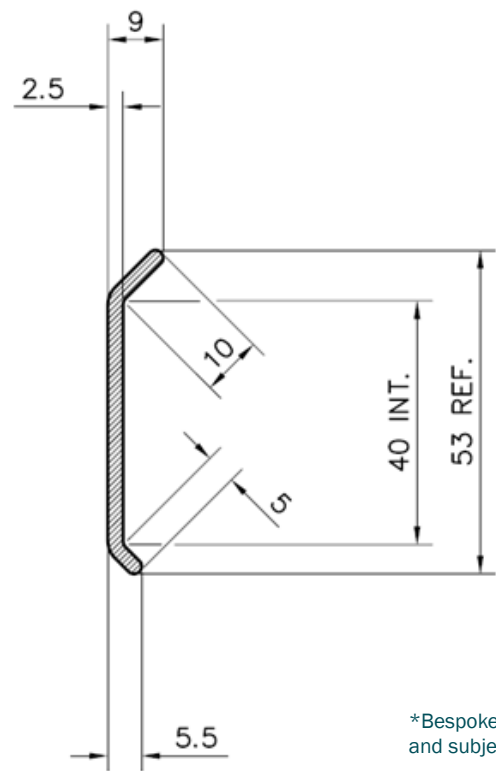

PRODUCT TITLE	PRODUCT NO	COVERAGE M <sup>2</sup>	UNIT SIZE	COLOUR
<b>Liquid Applied Membrane Systems (150mm Watershed Trims)</b>				
TremTrim 150mm LQD Drip Trim 2.5m	RW162511393	2.5m Linear meters	150mm Face, 75mm Leg, 2.5m length	Black
TremTrim 150mm LQD Drip Trim Ext Corner	RW162511394	N/A	150mm face, 75mm leg, 200mm x 200mm returns	Black
TremTrim 150mm LQD Drip Trim Int Corner	RW162511395	N/A	150mm face, 100mm leg, 200mm x 200mm returns	Black

# Termination Bars

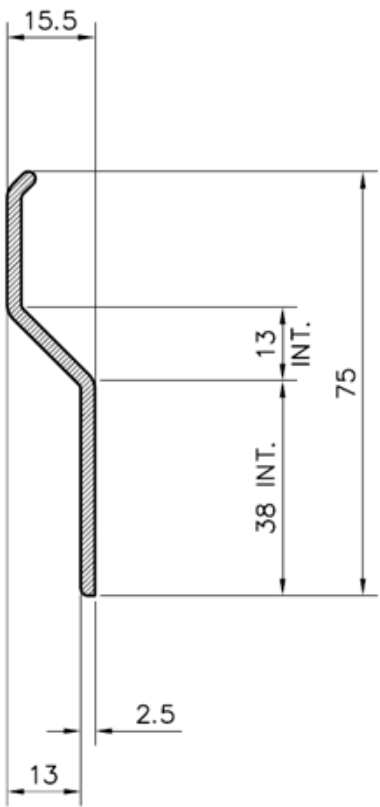

PRODUCT TITLE	PRODUCT NO	COVERAGE M²	UNIT SIZE	COLOUR*
Termination Bars				
TremTrim Term Bar 2.5m	RW165511396	2.5m Linear meters	53mm Face, 2.5m length	Black
TremTrim Dual Term Bar 2.5m	RW165511397	2.5m Linear meters	75mm Face, 2.5m length	Black

TremTrim Term Bar 2.5mm

\*Bespoke trim colours are available upon request and subject to a minimum order quantity.

TremTrim Dual Term Bar 2.5mm

PRODUCT TITLE	PRODUCT NO	COVERAGE M²	UNIT SIZE	COLOUR*
Hard Edge				
Trem Hard Edge 3.0m	RW170511349	2.5m Linear meters	0.7mm thick, 50mm x 50mm returns, 3m length	Metal

# Application | TremTrim

All TremTrim accessory products should be suitably clean and cut to size before installation.

## GRP Trims

Mechanically fix TremTrim GRP edge trims to roof perimeters at approx. 200-300 mm centres (subject to wind load calculations) using substrate specific fasteners. Clouts nails are not recommended.

At the end of each trim joint, install strengthening cleats and ensure the trims are hooked into position. Position trims so that a slight gap is maintained between the vertical leg of the trim and external façade avoiding any type of capillary action.

Before applying waterproofing membranes directly to the trim, ensure the bonding area is clean and prepared with a system specific primer as stated within the project specific specification.

## Termination Bars

Mechanically fix TremTrim termination bars to all required vertical details at approx. 300 mm centres using substrate specific fasteners. Clouts nails are not recommended. Termination bar ends should be lightly butted and used to pin waterproofing membranes in place. Point the projecting lip with Tremco approved Illbruck SP510 mastic using a bucket handle pointing technique.

## Trem Hard Edge

All exposed insulation edges, such as gutter steps or changes in level, must be suitably protected with a hard-edge batten or metal angle. Metal angle hard edges can be spot bonded to vulnerable insulation edges with TremStik polyurethane adhesive.
