· SVHC -

#### · Additional information:

For the wording of the listed hazard phrases refer to section 16.

While curing the following substances are formed and released by a reaction with atmospheric humidity: Carbon dioxide (CO2)

# **SECTION 4: First aid measures**

#### · 4.1 Description of first aid measures

• General information:

Symptoms of poisoning may even occur after several hours; therefore medical observation for at least 48 hours after the accident.

Take affected persons out of danger area and lay down.

#### • After inhalation:

Supply fresh air and to be sure call for a doctor.

In case of unconsciousness place patient stably in side position for transportation.

#### After skin contact:

Immediately wash with water and soap and rinse thoroughly. Immediately remove all soiled and contaminated clothing If symptoms persist consult doctor.

After eye contact:

Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.

- After swallowing: Do not induce vomiting; call for medical help immediately.
- · Information for doctor: No further relevant information available.
- 4.2 Most important symptoms and effects, both acute and delayed May cause an allergic skin reaction.
   May cause allergy or asthma symptoms or breathing difficulties if inhaled.
   Irritating to eyes, respiratory system and skin.
   Harmful if inhaled.

Suspected of causing cancer.

acc. to (EC) No 1907/2006, as amended by UK SI 2019/758

Revision: 04.09.2021

Trade name: illbruck FM110 (Contd. of page 3) May cause damage to organs through prolonged or repeated exposure. · Hazards No further relevant information available. • 4.3 Indication of any immediate medical attention and special treatment needed No further relevant information available. **SECTION 5: Firefighting measures** 5.1 Extinguishing media Suitable extinguishing agents: CO2, powder or water spray. Fight larger fires with water spray or alcohol resistant foam. · For safety reasons unsuitable extinguishing agents: Water with full jet · 5.2 Special hazards arising from the substance or mixture Formation of toxic gases is possible during heating or in case of fire. Carbon monoxide (CO) Carbon dioxide (CO2) Nitrogen oxides (NOx) Under certain fire conditions, traces of other toxic gases cannot be excluded, e.g.: Hydrogen cyanide (HCN) 5.3 Advice for firefighters • **Protective equipment:** Wear self-contained respiratory protective device. SECTION 6: Accidental release measures • 6.1 Personal precautions, protective equipment and emergency procedures Wear protective equipment. Keep unprotected persons away. Avoid contact with the eyes and skin. Ensure adequate ventilation. 6.2 Environmental precautions: Do not allow to enter sewers/ surface or ground water. · 6.3 Methods and material for containment and cleaning up: Dispose of contaminated material as waste according to Section 13. Ensure adequate ventilation. Do not flush with water or aqueous cleansing agents 6.4 Reference to other sections See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information. **SECTION 7: Handling and storage** · 7.1 Precautions for safe handling Ensure good ventilation/exhaustion at the workplace. Open and handle receptacle with care. Avoid contact with the eyes and skin. Avoid breathing vapours/spray. Wear suitable protective clothing and gloves. The usual precautionary measures are to be adhered to when handling chemicals.

Printing date 04.09.2021

Version number 11

Revision: 04.09.2021

Trade name: illbruck FM110

(Contd. of page 5) CAS: 115-10-6 dimethyl ether PNEC 0.155 mg/L (fresh water) 160 mg/L (sewage treatment plant) 1.549 mg/L (intermittent release) 0.016 mg/L (salt water) PNEC 0.045 mg/kg (soil) 0.069 mg/kg (sediment (salt water)) 2,2',6,6'-tetrabromo-4,4'-isopropylidenediphenol, propoxylated PNEC 10 mg/L (sewage treatment plant) · Additional information: The lists valid during the making were used as basis. · 8.2 Exposure controls Personal protective equipment: · General protective and hygienic measures: The usual precautionary measures are to be adhered to when handling chemicals. Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing Wash hands before breaks and at the end of work. Ensure that washing facilities are available at the work place. Avoid contact with the eyes and skin. Avoid breathing dust/fume/gas/mist/vapours/spray. Wear suitable protective clothing and gloves. **Respiratory protection:** In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device. This product should not be used under conditions of poor ventilation unless a protective mask with an appropriate gas filter (i.e. type A1 according to standard EN 14387) is used. For further guidance. please refer to HSE HSG53 "Respiratory Protective Equipment at work - A Practical Guide". Protection of hands: Protective gloves The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation Material of gloves Nitrile rubber. NBR Recommended thickness of the material:  $\geq 0.4$  mm Butyl rubber, BR Recommended thickness of the material:  $\geq 0.7$  mm

# **SECTION 10: Stability and reactivity**

- · 10.1 Reactivity No further relevant information available.
- · 10.2 Chemical stability
- Thermal decomposition / conditions to be avoided:
- No decomposition if used according to specifications.
- · 10.3 Possibility of hazardous reactions No dangerous reactions known.
- 10.4 Conditions to avoid No further relevant information available.
- 10.5 Incompatible materials: No further relevant information available.
- · 10.6 Hazardous decomposition products:

Formation of toxic gases is possible during heating or in case of fire.

Carbon monoxide and carbon dioxide

Nitrogen oxides (NOx)

Under certain fire conditions, traces of other toxic gases cannot be excluded, e.g.:

Hydrogen cyanide (prussic acid)

# **SECTION 11: Toxicological information**

· 11.1 Information on toxicological effects

· Acute toxicity

Harmful if inhaled.

#### Ecotoxical effects:

#### CAS: 9016-87-9 diphenylmethanediisocyanate, isomers and homologues

NOEC/21 d >10 mg/L (daphnia magna)

#### · Other information:

This product contains no substances in Annex I to Directive EC 1005/2009 concerning ozone depleting substances

#### 12.5 Results of PBT and vPvB assessment

- **PBT:** Not applicable.
- · **vPvB:** Not applicable.
- **12.6 Other adverse effects** No further relevant information available.

# **SECTION 13: Disposal considerations**

#### · 13.1 Waste treatment methods

#### · Recommendation

Must not be disposed together with household garbage. Do not allow product to reach sewage system. Disposal must be made according to official regulations.

Do not pierce or burn, even after use.

· European	waste catalogue
16 05 04*	gases in pressure containers (including halons) containing hazardous substances
08 05 01*	waste isocyanates
HP3	Flammable
HP4	Irritant - skin irritation and eye damage
HP5	Specific Target Organ Toxicity (STOT)/Aspiration Toxicity
HP7	Carcinogenic
HP13	Sensitising

#### · Uncleaned packaging:

• **Recommendation:** Dispose of packaging according to regulations on the disposal of packagings.
